

Welcome to Moodle (Rushmore Business School)

Moodle is a web-based course management and collaboration portal that enables educators to manage course materials and to communicate with other students. With Moodle, you can take surveys, quizzes, and tests; send and receive course mail; post messages to threaded discussions and chat rooms; upload assignments using an online Turnitin Service generating a complete report and more. You can check your progress and grades at any time during a course. Using Moodle 2.6 Minimum browser requirements: recent Google Chrome, recent Mozilla Firefox, Safari 6, Internet Explorer 9 (IE 10 required for drag and drop of files from outside the browser into Moodle). Operating systems: Windows (XP, Vista, Win 7), Mac (minimum OS X 10.4) Software and feature requirements: Java, Java script, Popups, Cookies, Ajax (If Java Script is enabled, then all common browsers should open HTML pages with Ajax applications) Plugins: Adobe reader, Adobe flasher. Moodle website is: <http://moodle.rbs.ac.mu/>

What is Moodle

Rushmore Business School is an international private tertiary education institution providing academic and professional courses to school leavers, graduates and the business community. The Business School is fully accredited and all its courses have been approved by the Tertiary Education Commission and the Mauritius Qualifications Authority in Mauritius and the British Accreditation Council in the United Kingdom. (First in Africa)

Moodle is a Virtual Learning Environment (VLE) that allows the classroom to extend onto the web. It is not a program to replace face - to - face teaching, but to support it with a range of flexible on - line tools, as well as providing a place to upload resources for course units. Each course unit supported by moodle typically has a single course site within the moodle environment. Moodle course site designers have many options available to them when setting up a course. They may choose to provide tools so you may interact with other students on your course (via discussion forums and wikis); upload assignments; access resources and much more.
